Bela Vista, São Paulo - SP

EDUCATION

Postgraduate specialization in Data Science and A.I. applied to Healthcare

Data Science Academy

Nov, 2024 – Mai, 2025

Radiation Therapy Medical Physics Residency

Hospital Sírio-Libanês

Mar, 2022 – Mar, 2024

B.Sc Medical Physics

Campinas State University

Mar, 2013 – Dec, 2019

ADDITIONAL EXPERIENCE

2026 – IT Support – Google

2025 – XXIV Course on State-of-the-Art Radiotherapy and Quality Control – HSL

2024 – SBRT y SRS – Rayos Contra el Cancer - RCC

2024 – II Central Nervous System Radiosurgery Course – Real Hospital Português

2023 – Speaker at LDR Prostate Brachytherapy Mini-Course – HSL

2021 – E-Learning: Safety and Quality in Radiotherapy – IAEA

2020 – 2nd Internacional Radiobiology Course – HA Barretos

2019 – Basic Radiotherapy Course – HSL

LANGUAGES

Portuguese – Native

English – B1

Spanish – B1

JOÃO VITOR M. FERNANDEZ

Age: 35, Radiotherapy Medical Physicist, Brazil

Radiotherapy Specialist (Hospital Sírio-Libanês / ANSN – RA0600)

Radiation Safety Officer – (ANSN – RT 0799)

WORK EXPERIENCE

2026 – Present – Medical Physicist – Bandeirantes Regional Hospital

Full-time medical physicist / deputy radiation protection officer responsible for external beam radiotherapy and brachytherapy treatment planning, instruments calibration, periodic dosimetry (IAEA TRS-398), patient-specific quality assurance (PSQA), and quality control of LINACs (Halcyon and Vital Beam), including IGRT (CBCT MV and Identify).

2024 – 2026 – Medical Physicist (Mid-level) – HapVida Notrelabs

Full-time medical physicist responsible for external beam radiotherapy treatment planning using 3D techniques (XiO / Monaco) and VMAT (Monaco), clinical form preparation, absolute dosimetry following IAEA TRS-398 and performance indicator monitoring.

2023 – Extracurricular Internship – Hospital Vila Nova Star

Observational visit to the radiotherapy department to follow treatments using Tomotherapy (TBI and craniospinal irradiation) and Gamma Knife, including liver SBRT with respiratory tracking, as well as equipment quality assurance practices.

2022 – 2024 – Medical Physics Residency – Hospital Sírio Libanês

Medical physics residency in radiotherapy. Activities included treatment planning and optimization for 3D-CRT, IMRT, VMAT, SBRT, and SRS, dosimetry practice following IAEA TRS-398, PSQA using EPID, ionization chambers, and radiochromic films, brachytherapy (prostate LDR and HDR gynecological, interstitial, and intraoperative), IGRT with 2D kV/MV imaging and Cone Beam CT, intrafraction motion monitoring technologies such as ExacTrac, OSMS, and Calypso, and respiratory motion management techniques, including 4D-CT and gating.

2019 – Mandatory Clinical Internship – Hospital de Clínicas da UNICAMP

Supervised mandatory internship in partnership with the State University of Campinas, covering Radiotherapy, Diagnostic Radiology, and Nuclear Medicine, totaling 360 hours of hands-on clinical experience.

2019 – Mandatory Clinical Internship – CAISM: Hospital da Mulher J. A. Pinotti

Supervised mandatory internship focused on Radiotherapy, including 2D and 3D breast treatment planning using the XiO TPS.

2019 – Observational Internship – Hospital de Amor de Barretos

160-hour observational internship in the radiotherapy department, following all stages of the radiotherapy treatment process, from CT simulation and external beam treatment planning (3D-CRT and IMRT) to LDR brachytherapy and treatment delivery.

TECHNICAL SKILLS

- Programming in Python, R and C# (Eclipse Scripting API);
- Experience with Varian (ARIA) and Elekta (Mosaic) R&V Systems;
- Experience with Varian (Novalis, TrueBeam, Vital Beam, Halcyon) and Elekta (Synergy) Linear Accelerators;
- Experience with Varian TPS (Eclipse) and Elekta TPS (XiO / Monaco);
- Experience with HDR brachytherapy (gynecological, interstitial, and intraoperative) and LDR (Ir-192)
- Experience with direct 3D printing bólus for radiotherapy.
